

## Data Sharing Statement

<b>Article Info</b>	http://dx.doi.org/10.21037/jtd-20-1761.	
<b>Item</b>	<b>Question</b>	<b>Authors' Response (place "-" if not applicable)</b>
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	
3	What data in particular will be shared?	In particular, the data for chest tube removal times and postoperative complications will be shared.
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Protocol for blood patch pleurodesis has been shared as supplemental material. Additional statistical analysis plan, informed consent form, and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or survival date may be updated over time.
7	To whom will you share the data?	Thoracic surgeons or pulmonologists interested in utilizing autologous blood patch pleurodesis.
8	For what type of analysis or purpose?	To better understand the use and efficacy of blood patch pleurodesis in treating pulmonary air leaks. The data can also help provide instructional support in how to conduct a blood patch for air leak treatment.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: hasan.irsa@mayo.edu
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
